### **DETAILED ACTION**

Applicant's argument on 12/14/2006 concerning the Yoon reference is noted, thus the rejection concerning Yoon is withdrawn.

#### **Claim Rejections –35 USC § 102**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 7-9 are rejected under 35 USC § 102 (b) as being anticipated by Kharebava et al (SU 1792627).

Kharebava et al teach a drink comprising 0.3-0.9% (about 1%) green tea, *Stevia* and ascorbic acid (vitamin) that reads on claims 1, 2, 4, 5, 8, and 9. The product does not contain sucrose, which reads on “free of sucrose” in claims 3 and 7.

Thus, the invention is anticipated over the reference.

#### **Claim Rejections –35 USC § 103**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1655

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kharebava et al (SU 1792627) in view of Li (CN 1086091A).

As discussed above, Kharebava et al teach a drink comprising green tea (0.3-0.9%, about 1%), *Stevia*, and ascorbic acid (vitamin).

Li teaches a tea bag product (a drink) comprising licorice roots that are Chinese herbal medicine (Chinese licorice roots).

It is well known that it is *prima facie* obvious to combine two or more ingredients each of which is taught by the prior art to be useful for the same purpose in order to form a third composition which is useful for the same purpose. The idea for combining them flows logically from their having been used individually in the prior art. *In re Sussman*, 1943 C.D. 518; *In re Pinten*, 459 F.2d 1053, 173 USPQ 801 (CCPA 1972); *In re Susi*, 58 CCPA 1074, 1079-80; 440 F.2d 442, 445; 169 USPQ 423, 426 (1971); *In re Crockett*, 47 CCPA 1018, 1020-21; 279 F.2d 274, 276-277; 126 USPQ 186, 188 (1960).

Therefore, it would have been *prima facie* obvious for one of ordinary skill in the art at the time the invention was made to combine Chinese licorice roots in Li with the green tea, *Stevia*, and ascorbic acid in Kharebava et al since both teach using the ingredients in a drink and both of the products yielded beneficial results individually in the art, one of ordinary skill in the

art would have been motivated to make the modifications. The result-effective adjustment in conventional working parameters (e.g., determining the concentration of the components within the composition) is deemed merely a matter of judicious selection and routine optimization that is well within the purview of the skilled artisan.

Thus, the invention as a whole is *prima facie* obvious over the references, especially in the absence of evidence to the contrary.

### **Conclusion**

No claim is allowed.

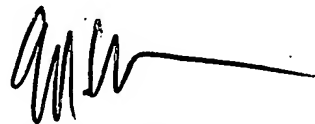

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
